Easy Six Cube Bookshelf

I love the storage cubes in kids rooms because they give you an opportunity to have your children clean their own rooms. Featuring six cubes with an opening of 12" x 13" deep x 11 ½" tall, this collection works perfectly with most standard sized pop up canvas totes. And cute hardware label holders and have your kids cleaning their own rooms! Fully framed for extra support, this one is easy to build and you will see more from this collection soon!

D	4	1x12	12 1/4"	Cubby Dividers
E	4	1x2	31"	Legs
F	6	1x2	37 1/2"	Side Shelf Trim

IN GENERAL

Refer to the blog at www.knock-offwood.com for any comments or suggestions for this plan. Always wear necessary safety equipment and take safety precautions. Check for square after each step. Measure all joints out and mark clearly with a square on BOTH sides of the joint (so you know where to nail). Use glue unless otherwise stated. Always predrill and countersink any screws. If you are using MDF, avoid fastening too close to the edges to avoid splitting your MDF.

PLANS: 6 Cube Bookshelf

DIMENSIONS AND COMPOSITION

Dimensions and composition are shown above. The most inexpensive options for the finish are detailed below.

FOR PAINTED FINISH use MDF cut into 11 ½" wide strips or primed MDF boards at least 11" wide or MDF shelving 11 ½" wide. Boards do not need to be exactly 11 ½" wide (as a standard dimensional 1x12 is). Frame the piece out in pine 1x2s or hardwood 1x2s for increased strength. Seal with primer before painting.

FOR RUSTIC SOLID WOOD FINISH (Think Pottery Barn Kid's Thomas Collection) Build the box out of 1x12 boards (choose straight 1x12s) and trim with 1x2s made of pine or whitewood. You may need to add wood conditioner to the wood to keep the stain from going on "blotchy."

FOR THE FRAMED IN SOLID HARDWOOD FINISH Buy A1 Plywood in the hardwood of choice (for example, maple) and have the plywood cut at the hardware store into 11 ½" wide strips. These strips are now referred to as 1x12s. Buy matching hardwood 1x2s for the legs and face framing.

ANAWHITE KNOCK-OFF WOOD

100s OF FREE AND EASY KNOCK-OFF FURNITURE PLANS TO SAVE YOU \$1000s

PLANS: 6 Cube Bookshelf

STEP 1: BUILD THE BOX

Mark out all of your joints as shown in the diagram on the cut pieces. Predrill and countersink all screws, using 2" screws and glue. Adjust for square.

STEP 2: BOX

Okay, you are probably thinking, how do I screw the cubby divider to the middle shelf, right? Please just trust me. Add some glue and you can add a nail toenailed in to keep it there, the main thing is to screw the sides to the bottom shelf

PLANS: 6 Cube Bookshelf

STEP 3: LEGS

Attach the legs to the box with finish nails and wood glue. Keep outside edges flush and make sure you also nail to the shelves. Adjust for square.

STEP 4: SHELF TRIM

Now is the step where we attach the cubby dividers in place. Think about it – there is no force or stress on this joint, so a few finish nails from the front and back and a good glue job will keep everything in place. Follow the directions shown above.

PLANS: 6 Cube Bookshelf

STEP 5: OPTIONAL BACK

If you choose to add a plywood back to the shelves, attach with $1 \frac{1}{4}$ " nails and glue. Don't forget to attach to the middle shelf trim. TIP: You may be able to use beadboard wainscoating for a back for a cheap and easy and chic back.

FINISHING

Fill all holes with wood filler. Sand with coarse sandpaper. Fill holes with wood filler again, and sand with medium grit sandpaper. Then finish with a fine sandpaper. Always sand in the direction of the wood grain. If you are painting, prime, painting the insides first, outsides last. Add two coats of paint. You can add a clear top coat if you wish. For staining, always test out a scrap piece, with wood filler. If the wood filler is not taking stain, you may wish to buy a color coordinated wood filler and fill your holes with this. If the stain is going on blotchy, you may need to apply a wood conditioner prior to the stain. Apply a top coat if necessary.
